

To make your
workflow excellent.

The Refill Revolution

The revolutionary boxing and refill concept for pipette tips

The Refill Revolution

Maximum precision, sophisticated design and the highest purity are the demands we place on our products.

For over 45 years, we have been manufacturing tailor-made pipette tips. With these years of experience, technical expertise and our state-of-the-art production facilities, we have developed a innovative and flexible refill system. Suitable for your requirements and applications. Robust and resource-sparing. Safe and reliable.

Discover our refill revolution on the following pages. Be surprised by the sophisticated details. Get to know new features and advantages and last but not least – try it out!

Your SARSTEDT team

The refill revolution – sustainable and environmentally conscious	16
Our raw materials – valuable and reusable	18
Convenient and tested	20
10 µl pipette tips – small and fine	22
20 µl pipette tips – long and precise	24
200 µl pipette tips – superior and effective	26
300 µl pipette tips – slim and slender	28
1,000 µl pipette tips – proven quality and in the version you need	30
1,250 µl pipette tips – long and versatile	32
1,250 µl pipette tips – extra-long and slender	34
Compatibility table - Pipette tips	36

One system – four options

Saves up to 70 % plastic

The box

Pipetting is the central element in every laboratory. The further developed SARSTEDT pipette tip box is a universal and robust solution at the heart of our new pipette tip system. Thanks to a resilient laser marking on each tray, you can view important information such as volume, batch or durability reliably, conveniently and quickly. The box is at the heart of our tip system.

p. 6

The SingleRefill

Sustainability is a must for today's society. With the new SARSTEDT SingleRefill, you can now also refill filter tips easily and using fewer resources. The closed design protects the pipette tips from contamination and thus enables hygienic and ecological refilling. The SingleRefill is the solution for your sustainable laboratory.

p. 8

The StackPack

High sample throughput requires efficiency. The SARSTEDT StackPack has been the optimal solution for high tip throughputs for years. You can transfer individual trays to the box in one manoeuvre. The compact and stable design means that tips can be removed for use directly from the StackPack itself. The StackPack is the innovative solution for efficient working.

p. 10

**Optimised design
– Less material**

The bag

Maximum flexibility is indispensable. The SARSTEDT bag packaging is the affordable alternative. The popular pressure seal allows you to open and close the bag hygienically. The additional tamper-evident seal gives you the assurance that the tips are guaranteed to be free of contamination until used. The bag is the affordable solution for flexible processes.

p. 14

The box

universal and robust

Central. Reliable. Convenient.

Versatile material

The robust box is the universal tool in your laboratory. Do you prefer to work directly from a pre-loaded box? Do you like using ecological refill systems? Or do you prefer to load your tips yourself? The box is the basis for every work method.

Space-saving stacking system

The coordinated design of the lid and base allows multiple boxes to be stacked on top of one another. Compact and stable, the tip boxes are perfect for stocking and storage.

Secure cap

The precise locking mechanism makes the box reliable for everyday use. Firmly closed, it also withstands harsh conditions during transport, storage and autoclaving.

Tip

Smooth surfaces – slippery boxes? Then try our separately available rubber feet. Simply insert in the base to ensure maximum grip on any laboratory benchtop.

The SingleRefill

ecological and clean

Sustainable. Protected. Hygienic.

Tip

Volume, batch, durability – thanks to the resistant laser printing on each tray, this valuable information is not lost even when the tray is transferred to the box! The tried and tested volume colour code helps you to find the desired tip at a glance.

Maximum protection

The optimal connection between the base part and the lid protects the tips from contamination all around – even after the packaging film has been removed. In this way, the SingleRefill can easily be transferred to the box. For maximum hygiene and safety.

Highest purity

The high-purity refill system is particularly suitable for very demanding applications. Finally, you can also refill filter tips without difficulty – even with our highest-purity standard Biosphere® plus!

Uncompromising ecology

The innovative design requires up to 41% less material than the box. This lightweight design saves energy and resources. All parts of the SingleRefill are stackable for collection as part of the recycling concept – this results in even lower waste volumes while ensuring maximum purity!

The StackPack

economical and space-saving

**Optimised design
– Less material**

Efficient. Stable. Cost-effective.

Economical stacking system

The sophisticated stacking system has space for 480 tips – at a height of two boxes. This saves 70% storage space for the area of only one single box!

Stable protection

The surrounding frames protect the tips from contamination. Its solid construction forms the strong backbone of the StackPack. The clearly marked pressure points on the sides make it easy to remove individual trays.

Exceptional fall protection

The firm anchoring of the trays to each other secures the StackPack even in the case of small, everyday accidents. Due to the exceptional stability, it even survives tipping and falling over without any problems.

Tip

High throughput, many tips – no problem!
Simply remove the tips directly from the StackPack.
The StackPack remains stable at all times due to its firm grip and sturdy frames.

A full box

quick and easy

Box – remove the empty tray

Press in the side clips.

Lift tray up...

...for space-saving disposal.

Insert SingleRefill

Insert the entire SingleRefill into the box.

Lock into place with slight pressure.

Remove the lid and continue working.

Fill from StackPack

Press the pressure points at the front and back.

Lift upwards.

Insert into the box and snap into place. Remove the lid and continue working.

The bag

the cost-effective alternative

Hygienic. Affordable. Flexible.

Convenient closure

The sturdy bag can be closed again hygienically. This allows you to gradually refill your tip boxes by hand as required.

Secure sealing

The additional tamper-evident seal gives you the assurance that the tips are free of DNA, DNase, RNase and PCR inhibitors until used.

Coloured variants

The yellow and blue colours of the 200 µl and 1000 µl tips make rapid identification of the two tips even easier!

Tip

When refilling with tips from the bag, the labels on the box lid can be removed without leaving any residue. This makes the box a universal multi-purpose box for every tip variant.

The Refill Revolution

sustainable and environmentally conscious

Your choice!

Always stay flexible when choosing the right system for you. Our practical tip solutions can be selected according to your wishes and requirements – ecological and economical!

Energy-saving

Our box system combines particularly high stability with minimal material cost. The sophisticated design uses less plastic and thus also less energy in production!

Compact

In the StackPack, 480 tips only need as much space as 192 tips in 2 boxes. This saves storage space and optimises logistics and thus also fuel consumption during transport!

Saves resources

For the production of the StackPack system, up to 64% less material is required than for the box. This conserves resources – minimising plastic consumption!

Recycling

After use, the individual components of the box system can easily be placed inside one another. This makes it easier to collect the plastic, which is then recycled in a targeted manner using our recycling concept.

Our raw materials

valuable and reusable*

Precise pipette tips, packaged in a convenient and well-thought out system, are indispensable in your laboratory. But what should you do with the box system and the tray when you no longer need them?

With just a little effort, you can now save resources and reuse the high-quality plastic systems!

Why?

Our box is designed for optimum storage of pipette tips and is made of high-quality, single-origin plastic. No time-consuming separation is necessary for recycling. The materials can be easily reprocessed and reused for new products. This is environmentally friendly and conserves resources!

What?

The box systems for our pipette tips are valuable. With our recycling concept, they are returned to be primarily reused. In cooperation with our logistics partners, first we collect the empty boxes centrally. The plastics are then transported to a local recycling company and processed there. We then use the resulting regranulate for new products.*

How?

We take all the steps needed for successful recycling for you! Collate the individual components of the box, the SingleRefill and the StackPack and pack them efficiently in a suitable box. Enclose the clearance certificate* and contact us to collect the package free of charge. That's how easy it is to help conserve valuable raw materials!

* For the current status of the recycling process in your country, please ask your responsible SARSTEDT representative.

Convenient and tested

Diverse

Our pipette tips are as versatile as your applications. You can choose between filter tips, low retention tips and tips without filters. You are sure to find the ideal tip length and shape in our range for every application.

Certified

Each batch is tested thoroughly visually, dimensionally and functionally. An independent laboratory confirms that the limit values of the Biosphere® plus and PCR Performance Tested certification are complied with. Our batch certificates document this testing and approval process.

Compliant

Especially in certified, accredited or GMP laboratories, it is important to use pipette tips that comply with the international standard ISO 8655-2. Our certificates of conformity attest to the regular verification of this accuracy.

Registered

SARSTEDT tips bear the CE marking and are approved as in vitro diagnostic devices. They can be used for the analysis of specimens for diagnostic purposes.

Compatible

SARSTEDT tips fit universally on the pipettes of leading manufacturers. With our tips, it is no longer a problem to use several types of pipettes in the laboratory.

Certified & reliable

Uncompromising standard quality.

Whether in a box, in the SingleRefill, StackPack or bag – all new SARSTEDT tips carry the PCR Performance Tested seal and are immediately available in all areas of DNA and RNA analysis.

Extra safety

Now also available in the new SingleRefill.

The new Biosphere® plus SingleRefill combines the outstanding purity of the SARSTEDT tips with the convenient and economical box system.

10 μ l pipette tips

small and fine

Precise DE-M

10 µl pipette tips are suitable for accurately pipetting minimal liquid volumes due to their small size and thus their small dead volume.

Innovative

The sophisticated, new design makes the tip qualified for every application. Our system adapts to your needs. Whether it's high-purity work with the SingleRefill, high throughput with the StackPack or simply a filled box – there is a suitable solution for every need.

300 μ l pipette tips

slim and slender

Ergonomic design

Our new extra-slimmer tip easily fits into any reaction tube, into screw cap micro tubes and into small tubes without touching the vessel wall. With a length of 60 mm, it reaches to the bottom of the vessel and makes safe pipetting even easier. The volume can be conveniently monitored thanks to the clear filling level rings.

Innovative

The sophisticated, new design makes the tip qualified for every application. Our system adapts to your needs. Whether it's high-purity work with the SingleRefill, high throughput with the StackPack or simply a filled box – there is a suitable solution for every need.

Tip

Do you work with particularly viscous or expensive substances? Then try out our low retention tips for even better recovery!

1,000 μl pipette tips

proven quality and in the variant you need

Universal

Transparent, blue coloured, conductive, in a bag, a box, SingleRefill or StackPack – the 1,000 µl tip is our all-rounder. Of course, it is also available in the especially high-purity Biosphere® plus and low retention versions!

Advanced

Because a box or a bag is not enough, the 1,000 µl tips are now also available in our StackPack design. For fast processing directly from the StackPack and easy refilling. Are special protection of the tips and highest purity important for you? Then try our SingleRefill!

	70.3060	Pipette tip, 1,250 µl, PCR performance tested, 500 pcs./bag	-		Standard		5,000

Tip

You can find the suitable SARSTEDT tips for your pipette easily and conveniently in our online compatibility table at www.sarstedt.com.

1,250 μ l XL pipette tips

extra-long and slender

Extra long

The proven tip design in our new, innovative box system unites a familiar shape and revolutionary handling. The extra-long pipette tip reduces the risk of contamination, especially when using long collection tubes.

Reliable

The precision and reliability of our tip with your pipette is confirmed for you by means of conformity checks according to the international standard ISO 8655-2. The volume can be conveniently monitored thanks to the clear filling level rings.

1,250 µl standard and 1,250 µl XL in comparison

Ordering information

Vol.	Order no.	Description	Filter	Purity	Design	System	pcs./box
1,250 µl	70.3070.275	Low retention filter tip, 1,250 µl XL, transparent, Biosphere® plus, 96 pcs./box	+		Low retention		1,920
	70.3070.375	Low retention filter tip, 1,250 µl XL, transparent, Biosphere® plus, 96 pcs./single refill	+		Low retention		1,920
	70.3070.255	Filter tip, 1,250 µl XL, transparent, Biosphere® plus, 96 pcs./box	+		Standard		1,920
	70.3070.355	Filter tip, 1,250 µl XL, transparent, Biosphere® plus, 96 pcs./single refill	+		Standard		1,920
	70.3070.205	Pipette tip, 1,250 µl XL, transparent, Biosphere® plus, 96 pcs./box	-		Standard		1,920
	70.3070.305	Pipette tip, 1,250 µl XL, transparent, Biosphere® plus, 96 pcs./single refill	-		Standard		1,920
	70.3070.210	Low retention pipette tip, 1,250 µl XL, transparent, PCR Performance Tested, 96 pcs./box	-		Low retention		1,920
	70.3070.110	Low retention pipette tip, 1,250 µl XL, transparent, PCR Performance Tested, 480 pcs./stack pack	-		Low retention		1,920
	70.3070.200	Pipette tip, 1,250 µl XL, transparent, PCR Performance Tested, 96 pcs./box	-		Standard		1,920
	70.3070.100	Pipette tip, 1,250 µl XL, transparent, PCR Performance Tested, 480 pcs./stack pack	-		Standard		1,920
70.3070	Pipette tip, 1,250 µl XL, transparent, PCR Performance Tested, 384 pcs./bag	-		Standard		3,840

● = compatible
 10 = limited pipetting volume
 X = not recommended
 ■ = no testing carried out
 MC = multi-channel pipette

Pipette manufacturers revise or modify the pipette cones of their pipettors as part of technical changes. Therefore, our recommendations in the compatibility table are intended only as a guideline for orientation. In case of doubt, to be able to check the optimal fit and ejection behaviour of our tips with your pipette, we are happy to provide you with sample tips free of charge.
